CERTIFICATE SUPPLEMENT (*)

Austria

1. TITLE OF THE CERTIFICATE (DE).⁽¹⁾

Zeugnis Obduktionsassistenz

⁽¹⁾ in original language

2. TRANSLATED TITLE OF THE CERTIFICATE (EN).⁽²⁾

Certificate Prosection Assistance

⁽²⁾ If applicable. This translation has no legal status.

3. PROFILE OF SKILLS AND COMPETENCES.

Assistance during post-mortem examinations with regard to anatomy, histopathology, cytopathology as well as forensics on a doctor's orders and under a doctor's supervision.

The graduate

1. has basic knowledge of anatomy and (patho)physiology and understands the relevant medical terminology:

2. is able to integrate into a line organisation/hospital;

3. is familiar with typical structural and process organisations (including hygiene and waste disposal plan) in and

around pathological departments at hospitals as well as the role and function of assistant prosectors during autopsies; 4. is able to prepare the deceased for autopsy;

5. knows which documents are required for a deceased person and which approvals are necessary for autopsy;

6. is familiar with the procedures of common examinations/autopsies and the support activities to be performed by assistant prosectors;

7. knows which devices, instruments and consumables are required for the planned examination/autopsy in question, is able to check their functioning, if necessary, and supply them in compliance with the hygiene standards required;

8. is able to position a deceased person correctly in line with the planned examination/autopsy (on the autopsy table);

 is familiar with the requirements for preparing samples for cytological and histological analyses and for the longterm storage of bodies/conservation of bodies, organs and samples and is able to comply with them;

10. is able to carry out preparatory measures for coffining/burying of the body, including activities related to the collection and transport of the body;

11. is aware that it is necessary to create an appropriate framework for respectful farewells by surviving family members;

12. knows the further steps to be taken by family members (formalities, funeral);

13. is able to properly handle bodies to be examined on orders of public health authorities;

14. acts in line with the provisions on sterility and hygiene;

15. acts within the legal and technical limits of his/her profession.

16. recognises the importance of a culturally sensitive attitude in action situations;

17. applies basic communication skills in contact with family members and in the team

4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THE CERTIFICATE ⁽³⁾

Employment by hospitals; employment by other establishments under medical or nursing management or supervision that specialise in the prevention, diagnosis or treatment of diseases or in follow-up care, nursing of persons needing care or in collecting blood or blood components; employment by medical practitioners and group practices; employment by a self-employed biomedical analyst or radiology technologist; employment by public health authorities or research, science, industry and veterinary services.

⁽³⁾ if applicable

(*) Explanatory note

This document has been developed with a view to providing additional information on individual certificates; it has no legal effect in its own right. These explanatory notes refer to Decision No. 2241/2004/EC of the European Parliament and the Council of 15 December 2004 on a single Community framework for the transparency of qualifications and competences (Europass). Any section of these notes which the issuing authorities consider irrelevant may remain blank.

More information on transparency is available at: <u>http://europass.cedefop.europa.eu</u> or <u>www.europass.at/</u>

5. OFFICIAL BASIS OF THE CERTIFICATE	
Name and status of the body awarding the certificate	Name and status of the national/regional authority
School for medical assistant professions or course on	providing accreditation/recognition of the certificate
prosection assistance; for the address, see the certificate	Federal Ministry of Labour, Social Affairs, Health and
	Consumer Protection
Level of the certificate (national or international)	Grading scale / Pass requirements
ISCED 351	Rating of the performance at the final exam before the
Certificate pursuant to Article 11 (b) of	examination commission
Directive 2005/36/EC	"mit ausgezeichnetem Erfolg bestanden" (pass with
	distinction)
	"mit gutem Erfolg bestanden" (good pass)
	"bestanden" (pass)
	"nicht bestanden" (fail)
Access to next level of education/training	International agreements
Education in qualified medical assistance	-
Legal basis	•

Medizinische Assistenzberufe-Gesetz (Act on Medical Assistant Professions), Federal Law Gazette I No. 89/2012 *MAB-Ausbildungsverordnung* (Ordinance on Education and Training for Medical Assistant Professions), Federal Law Gazette II No. 282/2013

6. OFFICIALLY RECOGNISED WAYS OF ACQUIRING THE CERTIFICATE

Training in prosector assistance under the *MAB-Ausbildungsverordnung* (Ordinance on Education and Training for Medical Assistant Professions)

Additional information

Entry requirements: Successful completion of the ninth school grade or passed basic education exam, medical fitness; trustworthiness

Duration of education: min. 650 hours

Theoretical instruction:

<u>Subjects</u>: first aid and wound dressing; introduction to the healthcare system, including healthcare professions; ethical aspects of healthcare; introduction to general hygiene; applied ergonomy; health protection and promotion; communication and team work; medical terminology and documentation; anatomy and (patho)physiology: organ systems; autopsies, including devices, instruments and handling of specimens; foundations of infectiology and hygiene, including disinfection and sterilisation; legislation relevant for the profession

Practical training:

Hospital, forensic/anatomic/pathological institute: pathology department

Principles of education and training:

Theoretical instruction:

Orientation to situations and actions in discussing topics, issues and problems in training; learning from examples to give preference to developing and understanding basic principles and fundamental knowledge over frequently superficial knowledge transfer; consideration of the didactic principle "from simple to complex issues"; promotion of key competences as a prerequisite of the situation-specific application of professional competence in the fields of activities, including situational competence for actions in interpersonal relations; work in teams and small groups in order to practice skills and techniques, to reflect on attitudes, opinions, views, behaviours and experiences and to make them useful for further learning processes; consideration of principles of adult education; application of modern teaching, learning and examination methods; integration of theoretical and practical training to permit an optimal theory-practice transfer. In this context, it has to be ensured that within the framework of practical training, skills are only applied in patient care after the theoretical instruction relevant for the subject field in question.

Practical training:

The course participants/students are integrated in a team in practical training and actively participate in the relevant activities. To ensure an optimal theory-practice transfer, the guidance they receive in the course of traineeships is provided in agreement with and with continuous feedback to the course or school. This required didactic preparation, implementation, follow-up, reflexion and evaluation.

The competences acquired during practical training are documented by the course participants or students and signed off by teachers or healthcare professionals or the person responsible for training.

Within the framework of practical training, the course participants or students are only assigned activities that are directly related to their training.

Healthcare professionals may provide guidance to a maximum of three course participants or students at the same time in the course of practical training.

A sufficient number of suitable in-service training places is to be ensured by appropriate arrangements, such as cooperation agreements or other suitable measures. An in-service training place is suitable if the acquisition of the competences planned for the traineeship in question is ensured.

In planning and organising the traineeships, the objective is that practical training is provided at a minimum of two in-service training places.

The suitability of an in-service training place has to be ensured with a view to occupational safety and health. **More information** (including a description of the national gualification system) is available at:
